

GAP DICKINSON'S BRIDE HONEYMOON.

Described by His Bride for the Young Man Who Used to Read the Bible to Her.

Lillie G. Jack, the pretty seventeen-year-old daughter of Annie Jack, a widow, of 138 Baltic street, Brooklyn, was married to William E. Dickinson by the Rev. Mr. Gooden, a Methodist minister, in Brooklyn on Nov. 25 last. Mr. Dickinson was just twice the age of his bride, and owing to opposition on the part of the bride's mother the marriage took place without her knowledge or consent. Mrs. Jack, however, quite recently reconciled, and agreed that her daughter and son-in-law should come to live with her.

Now, Mr. Dickinson is a seafaring man living from Wading River, Suffolk county, L. I. and has a long record as Captain. He is tall and stalwart, but is not as youthful and might not be considered as handsome as Stenographer Lester S. Hubbard, who had been paying attention to Miss Jack for some time before Capt. Dickinson came along. Mr. Hubbard was a member in good standing of the First Presbyterian Church of Brooklyn, and Mr. Cuthbert C. Hall is pastor, and was regarded as a most devoted and promising young man.

Within two weeks after the marriage of Capt. Dickinson and Miss Jack, the Captain killed his wife good-by and went off to sea. On his return, about the end of the year, he was married to the bride, who had been removed from her mother's house, and that she was a widow. There was a partial disclosure of these things yesterday, at a hearing before Judge Cullen in the Supreme Court. Capt. Dickinson was found guilty of first degree murder, and was sentenced to the State Prison at Sing Sing for a term of years. The wife was found guilty of accessory before the fact, and was sentenced to the State Prison at Sing Sing for a term of years.

At the close of the proceedings, Mrs. Dickinson and her husband and Mrs. Jack and Stenographer Hubbard were taken to the State Prison at Sing Sing. The wife was found guilty of accessory before the fact, and was sentenced to the State Prison at Sing Sing for a term of years.

REVENUE UNDER TONS OF ICE.

Seven men are paying more or less duty—two will in all probability lose their lives—on a rather simple attempt to save time and labor which ended in disaster at 10:05 o'clock yesterday morning.

About two weeks ago Superintendent Crowell of the Consolidated Gas Works noticed that one of the several rows of benches or furnaces in the retort house toward the Forty-fifth street side of the enclosure, which covers the block between Forty-fourth and Forty-sixth streets, was out of order. A gang of six men was set to work to tear down the skeleton, composed of heavy brick much injured by the intense heat to which they had been subjected for three years. Yesterday morning a dozen of them attacked the first arch on the row, and the work was set on foot.

On Tuesday the retorts were all torn out and the iron work was removed from the top. There remained only the cross walls between the benches and the strong brick arches over them. A gang of six men was set to work to tear down the skeleton, composed of heavy brick much injured by the intense heat to which they had been subjected for three years. Yesterday morning a dozen of them attacked the first arch on the row, and the work was set on foot.

With shouts and yells of fright the other laborers fled from the building. Some ran to the roof, and others to the street. The great cloud of dust shot high through the sky. The gas company's men were not there. The work was set on foot.

At the close of the proceedings, Mrs. Dickinson and her husband and Mrs. Jack and Stenographer Hubbard were taken to the State Prison at Sing Sing. The wife was found guilty of accessory before the fact, and was sentenced to the State Prison at Sing Sing for a term of years.

AFTER THE GRIPPE.

The Grippe Responsible for More Deaths After Recovery Than During Its Course—How to Avoid the Danger.

Grippe, in itself, is but an ordinary debilitating ailment, but it is the after effects, the slowness of recovery that give it its great danger. Most cases, the person did not have sufficient vitality to rally after the disease itself had passed. The forces of nature were too weak to contend with the debility which the Grippe had left.

It is sad to think how many people have died who might have been saved if it were had been properly assisted and fortified after the Grippe had been driven from the system. Many physicians realized this fact, and assisted their patients over the dangerous after effects by bracing up and stimulating their vitality. This was done by the use of some powerful stimulant, and the result was that the patient was able to rally and recover.
